Live Release Rate				
Palm Spring Animal Shelter Live Release Rate (LRR): LRR is a meaningful parameter to indicate a community's progress toward improving outcomes for its animals. LRR is calculated by dividing the number of animals that enter PSAS alive less those who die or are euthanized (or are lost), by the total number of live animals received. PSAS tracks LRR for cats only, dogs only, other animals only, and combined. This is the method previously required for reporting to Best Friends Animal Society and does not include TNR numbers.				
	Cat	Dog	Other *	Total
PSAS Shelter LRR	90.6%	97.0%	80.9%	92.6%
* Note: The lower LRR for "Other" animals is largely due to sick/injured wildlife brought to the shelter. Of the 60 "Other" animals that died or were euthanized, 8 were pets, 52 were wildlife.

** Notes: <u>Cats Trapped But Kept:</u> The difference between intakes and outcomes for this category is due the fact that: 12 of these outcomes were for cats with intakes prior to 1/1/19 and there were 7 cats still in the shelter on 12/31/2019.
